CORE BOX REPAIR

Another Quality Service from Fundy Grinding

Repair

Re-Build

Reduce Costs

OFFERING COMPLETE REPAIR & RE-BUILD SERVICE

Repair

- We have templates manufactured to bolt on the core boxes
- This allows for reduced set up time for machining
- Core Boxes are repaired in our shop to allow for uniform coating to be applied
- All Core Boxes are recorded and numbered for tracking purposes
- All Core Boxes are checked to ensure that they can be rebuilt

Core Box To Be Repaired

Rebuild

Core Box Coated

- Core Boxes are Pre-machined in our shop
- Core Boxes are then prepped to be coated with NeDox Sf-2
- NeDox SF-2 coating provides a surface hardness of up to Rc 55
- The polymer impregnation of the NeDox SF-2 seals the surface to give the product its smooth and slippery surface

Reduce Costs

- With our repair process there is no need to replace the costly re-winder core box
- 60-70% savings over buying new
- The enhanced Surface coating that is part of the repair process allows for longer wear
- All Core Boxes are measured and checked to ensure repairs meet exacting standards
- Flexible turn around times
- Complete Service from Pick up to Delivery
